

We just setup our Bank Account with ICICI Bank as well and all customers can now make payments in our ICICI Bank Account as well. The details of our ICICI Bank Account are as follows :

Bank Name : ICICI BANK LTD.

Account Name : M/s. Webspiders Interweb Pvt. Ltd.

Account no. 001205028003

Bank Branch : C-Scheme, Jaipur

While we have our accounts with HDFC & AXIS the need for ICICI was being felt since last few months as we realized majority of our customers do their banking with ICICI and it would make things easier for them if we too have an account with ICICI Bank. Its really time consuming task for companies to setup an account with ICICI, they do demand a lot of paperwork from Pvt. Ltd. Companies, it took us more than three weeks before we could finally have our account operational with them.

The account is open for new orders, payments & sign ups..so start sending some payments now :p
